ABOUT SOURCEREE

Sourcereer delivers secure, scalable software and analytical capabilities that improve decision speed, operational readiness, and enterprise resilience. We modernize legacy systems, enable real-time access to critical data, and equip mission owners with timely, actionable insight across complex operational environments. By applying cloud architecture, agile development practices, and artificial intelligence, we reduce manual processes, accelerate analysis, and strengthen mission execution. As a proven small business partner to the Department of Defense, Department of Homeland Security, and the Intelligence Community, Sourcereer brings the speed, adaptability, and technical rigor required to meet evolving mission demands.

CORE COMPETENCIES

- Secure software development and application modernization
- Computer systems design and enterprise solution delivery
- Cloud architecture and real-time data access solutions
- Readiness analytics and decision-support systems
- Artificial intelligence-enabled workflow improvement and analysis
- Engineering, research, and technical advisory support
- Management consulting and operational process improvement
- Supply chain and industrial base risk analysis

DIFFERENTIATOR

- Over 15 years of software and Department of War experience
- Mission-Driven Focus on Defense and National Security
- Blend of Software Development and Deep Analytical Capabilities
- Agile and Engaged Leadership with Direct DoD Experience
- Culture of Innovation and Challenging the Status Quo

PRODUCTS

CODES & CERTIFICATIONS

SBA Certified Small Business

NAICS: 541512, 541330, 541511, 541519, 541611,
 541612, 541618, 541715, 541990

PAST PERFORMANCE

- Personnel and Readiness Infrastructure Support Management
 Multiple Award Task Order Prime
- Intelligence Delivery, Design Security and Scalable Optimization
- Foreign Investment (CFIUS) and Adversary Capital Analysis
- Readiness Management Decision Support Software Development
- Defense Services Support Center (DSSC), Computer/Electronic Accommodations Program (CAP)
- Custom Software and AI Development for Federal Agencies
- All-Source Intelligence Analysis for Military and Intelligence Clients
- Operational Support and Consulting for Critical National Security Missions
- Cyber Security Management and Analysis
